# TRUE, RESTFUL SLEEP WITH TEMPUR®

Great sleep is vital to us all. It's important for our health, development and wellbeing. And we know too many people still don't get the sleep they need.

At TEMPUR®, our purpose has always been to improve the sleep of more people every night, all around the world. That's why, since inventing the world's first viscoelastic mattress and pillow more than 30 years ago, we've gone on to innovate and develop a full range of leading sleeping products. And with our unique healthcare and medical heritage, we truly understand the importance of a good mattress and pillow to deliver better sleep.

Now, with the all new TEMPUR Pro® SmartCool™ range, we've taken our revolutionary sleep technology even further. Taking comfort and support to a whole new level to transform the sleep of people worldwide. So whether you toss and turn, or sleep with pain and discomfort, or sleep too hot, we have just the right solution for you. Because, when you spend one third of your life sleeping, you should settle for nothing but the best.

# BORN FROM SPACE AND PERFECTED FOR SLEEP

**The only mattress and pillow brand recognised by NASA<sup>1</sup>  
and certified by the Space Foundation<sup>2</sup>**

At the heart of each mattress and pillow we create is our iconic TEMPUR® Material, born from NASA technology. In the late 60s, NASA scientists invented a completely new material that was then used onboard the Space Shuttles.

Our founders realized the material's unique potential. So they took that original NASA invention and spent years perfecting it into TEMPUR® Material and created the world's first viscoelastic mattress and pillow.

First proving its value in the healthcare sector, TEMPUR® is now found in bedrooms around the world, transforming the sleep of millions. It's why we're the only mattress brand which was recognised by NASA for improving the quality of life for humankind<sup>1</sup>. This honour sets us apart, keeps us humble and inspires us to continually innovate, for sleep that's out of this world - and it all started with those original NASA scientists.

<sup>1</sup>The company and its products were recognised by NASA. At a joint press conference on May 6, 1998, NASA recognised TEMPUR®'s outstanding achievements in adapting the original NASA technology for everyday use and improving the quality of life for humankind.

<sup>2</sup>Visit [tempur.com/spacefoundation](https://tempur.com/spacefoundation) for certification information.

# TEMPUR® MATERIAL IS LIKE NOTHING ELSE ON EARTH

The name TEMPUR® reflects our material's temperature-sensitive nature. It's both viscous and elastic. A unique combination achieved by billions of ultra-sensitive cells that adapt to your body's unique shape, weight and warmth.

With TEMPUR® Material, you experience a sensation completely unique to you. It precisely aligns and conforms to every inch of you, relieving pressure from sensitive areas, including your shoulders, back, hips and joints for pure comfort and support throughout the night. It even absorbs motion from you or your partner, so you're less likely to disturb one another.

How TEMPUR® Material works is complex, but what it does is simple, helping you get that true, restful sleep.
